Success Story:

When one of our littles (I.R.) was asked what growth or improvement she experienced since being matched with her big, she replied:

"I'm more comfortable being in public places than before and I have less panic attacks since I've been with my big."

I.R.'s mom says that since her daughter has had a big in her life, her daughter is far more open with her and she can now talk to her daughter about just about anything.
